PROFESSIONAL SUMMARY

My name is Jimba Tshetrim and I'm from Bhutan. I have been working as a developer for 7+ years. I have a proven track record of developing complex applications and collaborating with cross-functional teams. Expertise in designing, developing, testing and implementing new features, and troubleshooting complex technical issues.

WORK EXPERIENCE

Dewave

Bhutan

Full Stack Developer — QA Engineer

January 2023 - December 2024

- Led the development of enterprise-level web applications using Next.js, with a strategic focus on SEO optimization to enhance client visibility and organic search rankings across diverse industries.
- Planned and oversaw the implementation of server-side rendering and static site generation in Next.js to ensure fast-loading, SEO-optimized user experiences.
- Managed the integration of Storyblok as a headless CMS, coordinating with development and content teams to streamline structured content delivery across multiple platforms.
- Collaborated with UI/UX designers, developers, and stakeholders to define requirements and deliver responsive, interactive interfaces aligned with business objectives.
- Directed comprehensive SEO audits and spearheaded the adoption of industry best practices, resulting in measurable improvements in search engine rankings and organic traffic.
- Supervised the design and implementation of automated end-to-end testing using Playwright, ensuring consistent quality across critical user journeys and application functionalities.
- Organized and executed performance and stress testing initiatives, identifying system bottlenecks and driving optimizations to meet performance benchmarks.

Selise Digital Platforms

Bhutan

Lead QA Engineer — Frontend Developer

January 2021 - January 2023

- Founded and led the QA engineering team from scratch, scaling it to 6-7 engineers and establishing a company-wide quality assurance process.
- Designed and implemented end-to-end testing pipelines using Cypress for five of the company's highest-priority projects, significantly reducing production issues and regressions.
- Standardized test strategies and integrated them with CI/CD pipelines, ensuring consistent test coverage and early bug detection throughout the development lifecycle.
- Developed multiple B2B and B2C enterprise-level applications for Switzerland's largest telecom and retail companies using Angular, delivering scalable and maintainable frontend solutions.
- Integrated GraphQL across several projects, leveraging fragments and parallel queries to optimize data fetching and cut API response times by 50%.
- Enhanced frontend performance by introducing lazy loading, auditing Webpack bundle sizes, and reducing initial load from 2.4MB to 1.2MB across multiple projects.

TECHNICAL SKILLS

Programming Languages: JavaScript/TypeScript, HTML5, CSS3/SCSS/SASS

Frontend Frameworks: React, Angular, React Native

Development Tools: Git, Webpack, npm/yarn, Jest, Cypress

Design Tools: Figma, Adobe XD, Sketch

Methodologies: Agile/Scrum, Design Systems, Responsive Design, Mobile-First Development

Soft Skills: Team Leadership, Cross-functional Collaboration, Technical Mentorship, Client Communication
